

ALEX CINOVOJ

DATA PIPELINE & SYSTEMS INTEGRATION ENGINEER

Columbus, Ohio | [linkedin.com/in/alexcinovoj](https://www.linkedin.com/in/alexcinovoj) | Available for 1099 contract engagements

Systems engineer and AI-native software builder with 13 years across enterprise IT, managed services, production support, cloud systems, and backend workflows. Brings the operational discipline to stabilize the unglamorous parts of a system: data movement, access, validation, incident response, documentation, and the handoff between vendors and internal teams.

RELEVANT CAPABILITY

Data & integration	PostgreSQL, Supabase/Postgres, API integrations, ETL/ELT workflows, schema design, migration planning, validation and reconciliation
Application & cloud	Next.js, TypeScript, Node.js, AWS S3, secure web workflows, role-based access patterns, production release controls
AI-native development	Expert: Claude and Claude Code; ChatGPT and OpenAI Codex. Advanced: Cursor. Agents, skills, MCP, prompt systems, code review, and AI-assisted full-stack delivery.
Operations & delivery	MSP escalation, incident triage, vendor coordination, environment documentation, observability, workflow hardening

PROFESSIONAL EXPERIENCE

TechTide AI | Founder & CTO | AI-Native Systems Engineering2025–Present

- Lead full-stack AI implementation work from architecture through deployment, using Claude Code, Codex, ChatGPT, Cursor, TypeScript, Next.js, APIs, and production controls.
- Own architecture decisions across application logic, data models, access boundaries, integrations, deployment, operational checks, and client handoff.

CPG Playbook | Co-Founder & CTO | AI Product Engineering2026–Present

- Build an AI-powered workflow platform for consumer brands, including product architecture, backend systems, AI interactions, operational controls, and user-facing workflows.
- Translate operator requirements into phased technical delivery with explicit data, access, and release considerations.

Enterprise IT & Managed Services | Systems Engineering, Production Support & Escalation2013–2025

- Progressed through corporate help desk, hospital desktop support and transformation work, systems engineering, and MSP escalation roles.
- Supported identity, endpoint, networking, Microsoft 365, cloud, security, ticketing, and client environments where downtime and unclear ownership create real business cost.

SELECTED TECHNICAL ENVIRONMENT

AI development: Claude / Claude Code (Expert), ChatGPT / OpenAI Codex (Expert), Cursor (Advanced), agents, MCP, prompt and context engineering

Data & backend: PostgreSQL, Supabase, REST APIs, TypeScript, Node.js, Next.js, data validation, workflow design

Infrastructure & operations: AWS S3, Azure AD, Intune, Microsoft 365, AVD, ServiceNow, Autotask, NinjaOne, UniFi, Blackpoint, ConnectSecure

Professional development: CompTIA A+ | Lovable Champion (community support role) | 9 Anthropic Academy course completions
